Author Name. 100-200 words. Use recent formal photograph. Biography should identify where the author earned his/her highest degree, present affiliation and position, current research interests, and number of papers published, number of conferences/seminars attended. After first sentence you can use pronoun of the person (he or she) and not the author’s first

* If the manuscript is an extended version of a conference or journal paper, add the details of conference title or journal paper link in footer. Manuscript should contain at least 30% new material, and it should clearly cite the prior publication and state what is the new material.

name and last name. List any memberships in professional societies separated by commas. Author biographies should always be written in the third person. If a photograph is provided, the biography will be indented around it. The photograph is placed at the top left of the biography. Personal hobbies will be deleted from the biography. The first author should include an e-mail address, which is optional for the other authors.

Always include any previously published works that are relevant to the current work. If you've never published anything before, don't say so; simply don't mention your publishing history. It is much better to leave it out than to draw attention to the fact that you are a new and amateur author. Instead, focus on your education, your professional experience or other endearing qualities.
